

*The new Lexus ES*

## All-wheel drive without compromise

*Some prefer sedans to SUVs for their elegance, understatedness and classic character. A preference that may require sacrifices on the practical side or winter driving capabilities. Unless you're driving the new 2021 Lexus ES with all-wheel drive, a striking sedan with commanding performance and zero compromises.*

### **Unconditional luxury in all weather**

Gravel roads, battering rain, crunchy snow: the new ES AWD helps deliver superb handling on any surface, no matter the conditions. Its sweeping design offers more than just head-turning looks: the vehicle is also built to drastically reduce cabin noise, providing a comfortable and luxurious driving environment.

The Lexus ES has everything it needs to face Quebec's unpredictable winters. Its Dynamic Torque All-Wheel-Drive System can direct 100% of engine torque to the front wheels, or split it evenly between the front and rear axles for intelligent AWD performance in a fuel efficient manner. The result: exceptional handling and manoeuvrability, even on a road slick with frozen rain. This adjustment takes place automatically, allowing you to focus on what's ahead.

Quebec winters may be tough, but the new Lexus ES AWD is tougher.

### **True refinement you can touch**

The moment you step inside, it becomes obvious the Lexus ES cabin is built to enhance driving pleasure. The luxurious materials are highlighted with refined accents, creating a rich and tactile driving environment. The sculpted front row seats can be customized through eight power adjustments. Heated and ventilated, they keep you comfortable even in the dead of winter.

Lexus research has demonstrated that during extended driving, the gentle rocking motion is continuously forcing your vision to adapt, making you feel increasingly tired. The unique design of the Lexus ES and its front seats minimizes vibrations, helping reduce driver fatigue. So you can remain alert even when a surprise snowstorm keeps you stuck on Highway 40 far longer than expected.

### **Technology to enhance your driving experience**

The available additional features elevate the Lexus ES infotainment functionalities to a whole new level. The Mark Levinson™ premium audio system with Clari-Fi 2.0 and Quantum Sound Logic technologies delivers rich, immersive sound. The 12.3-inch display with Apple CarPlay and Android Auto compatibility provides convenient access to your favourite music and apps, in addition to the full suite of Lexus Enform connected services.

Standard active safety features enhance your alertness while driving. The Lane Departure Alert will let you know if your vehicle is deviating from its current lane. In highway traffic, the All-Speed Dynamic Radar Cruise Control will adjust the speed according to the vehicle in front of you. Finally, Automatic High Beam headlamps will deliver maximum lighting without blinding incoming drivers by automatically switching off.

**The ES family**

If you're looking for a sporty driving experience with exceptional reactivity, the ES 350 model delivers 302 hp, thanks to a V6, 3.5L engine with 8-speed Direct Shift transmission. To reduce your carbon footprint, the ES 300h—one of Lexus self-charging hybrid electrics—has a city/highway gas consumption of only 5.5/5.2 L/100 km (all-wheel drive unavailable for this model).
